Viridian

MAKE THE MOST OF
YOUR SECURITY

2024

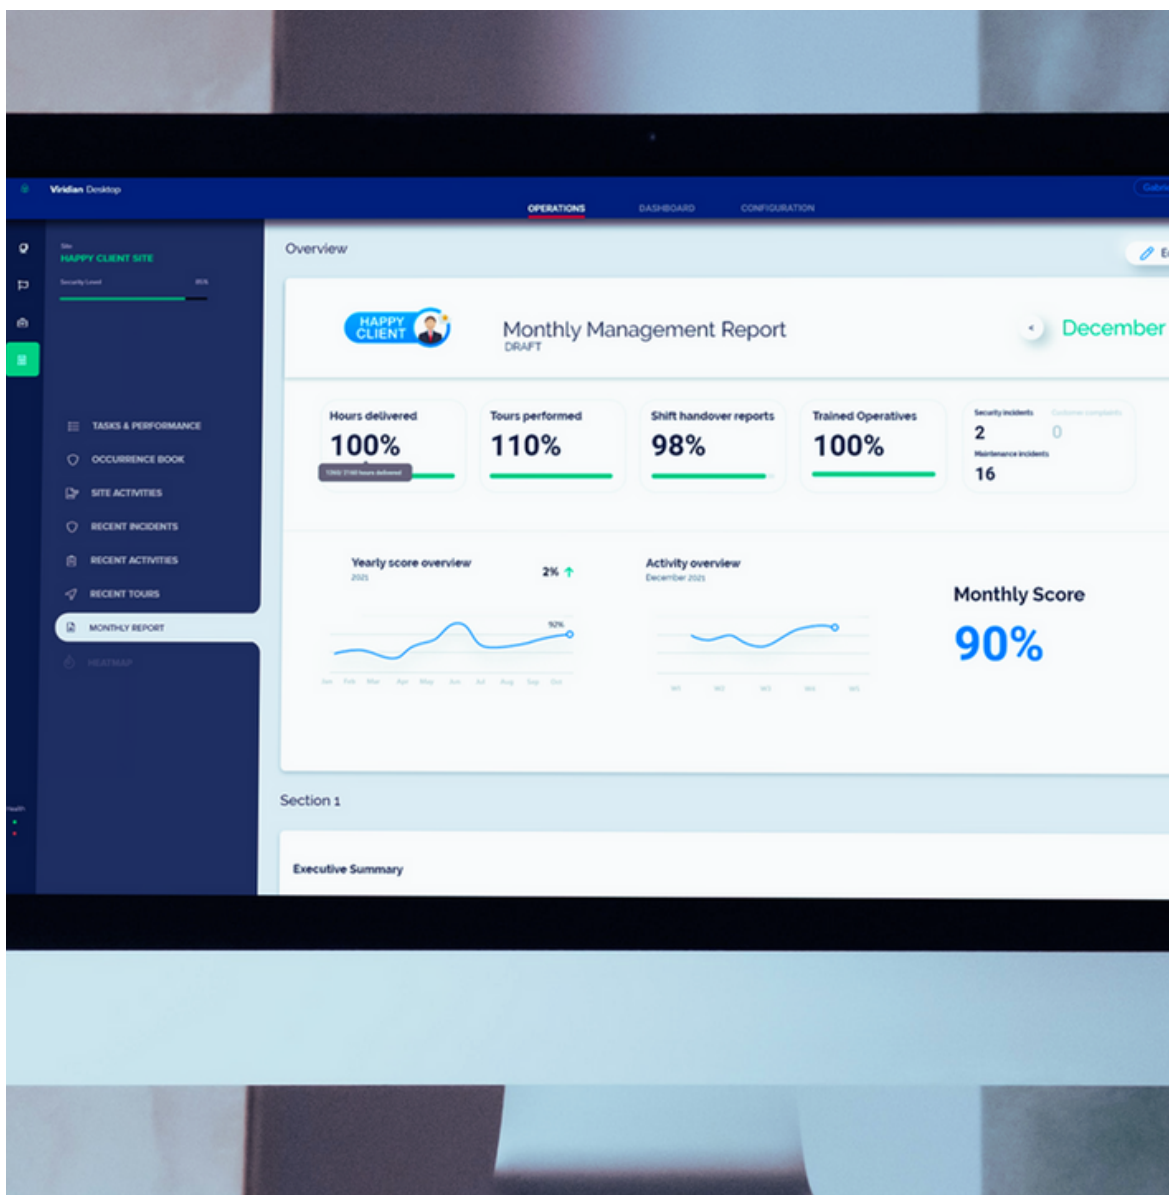

A part of

WHAT IS VIRIDIAN?

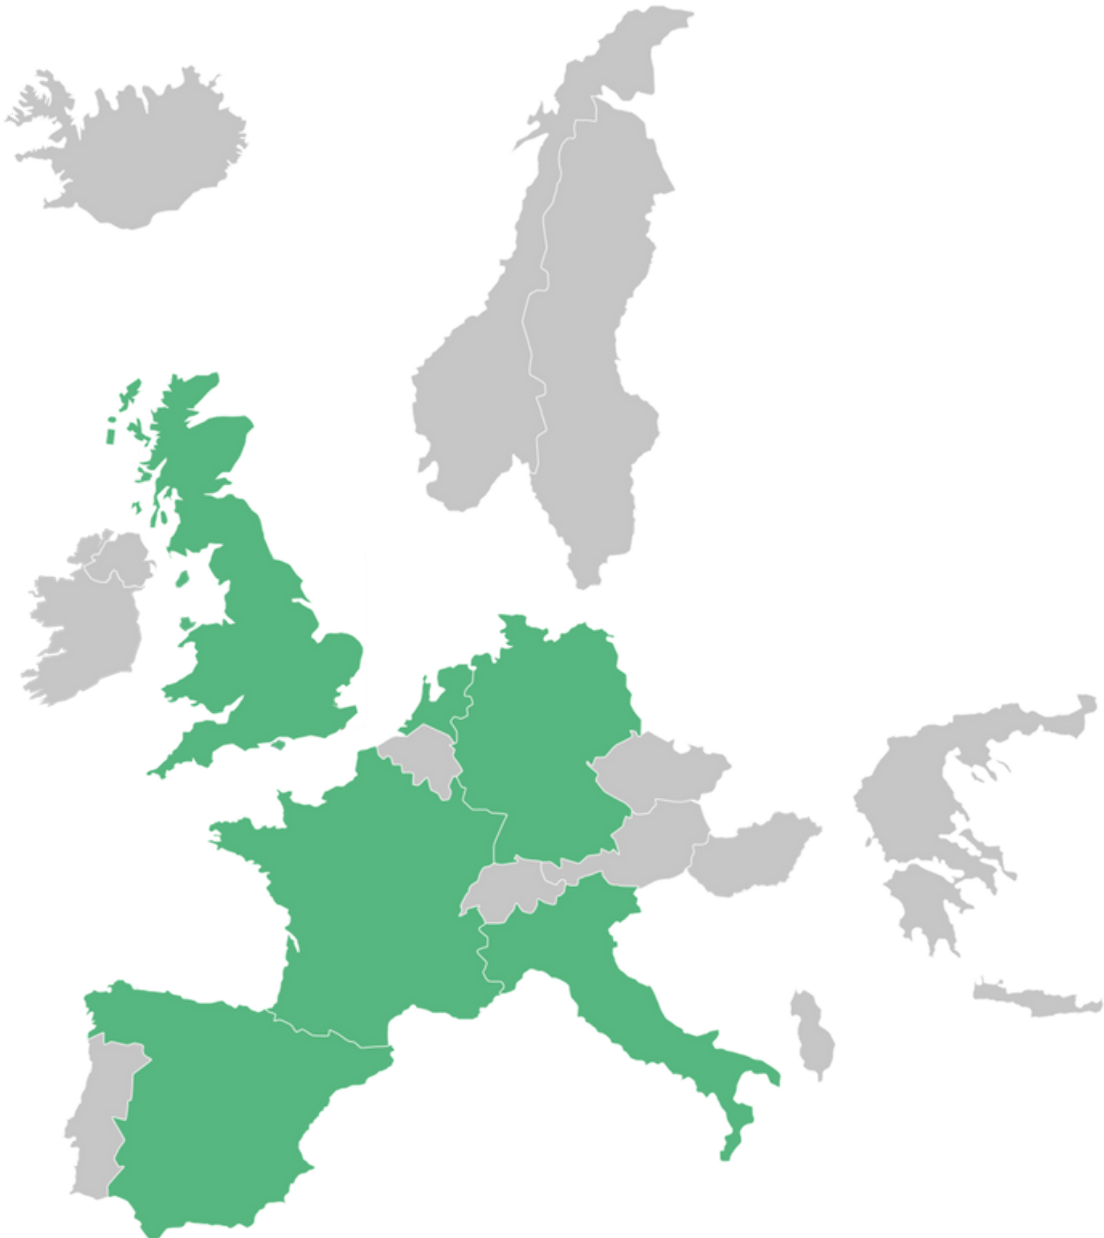

Viridian is ICTS' **all-in-one security operations management solution**. It's a comprehensive platform meticulously crafted to **enhance decision-making** processes and **amplify team performance**. At ICTS, we utilize Viridian to foster operational excellence and ensure compliance across our contracts.

Viridian was meticulously crafted by **operations, for operations**. Collaborating closely with our clients and staff, we've **developed a platform you can trust to fulfill all your operational needs**.

LOCATIONS

Viridian is an **award-winning** currently operational in over **50 sites** in **6 countries**.

WHAT VALUE DOES VIRIDIAN BRING?

Viridian isn't just another security tool—it's a **game-changer**. From guard attendance and activity tracking to mass notifications and lone-worker monitoring, Viridian offers a **suite of tools honed through real-world testing**. With a focus on transparency and optimization, Viridian **empowers organizations** to maximize staff performance, strengthen resilience, and drive operational efficiency.

Offers a single, unified scale for performance measurement and easy visibility of performance across different sites.

Centralizes all security-related information in one platform, ensuring transparency.

Delivers real-time information for proactive decision-making and swift incident response.

Reconciles compliance and resilience in real-time offering a 360-degree view of security.

Highly customizable to adapt to unique client requirements and seamless connectivity through APIs.

HOW DOES IT WORK?

Viridian entails 3 apps, **Companion**, **Desktop**, and **Manage**, working together and sharing data across **all security activities, such as:**

- All reports including incident reports.
- Patrols.
- Real-time KPI monitoring.
- Dashboard showing performance and activities.
- Custom alerts for incidents.
- Remote site visits.

WHAT MAKES VIRIDIAN DIFFERENT?

We conducted a survey asking the following questions:

- What's your priority when evaluating a Security Operations Platform?
- Which feature do you consider most crucial in a Security Operations Platform?

The results overwhelmingly favored:

- **User-friendly interface**
- **Quick incident response**
- **Be able to monitor all activities.**

Viridian is **simple to set up** - ready to be deployed at any point. The only things needed are your **KPIs, SLA and sites**. Its **open API** means it can also be connected to other tools to maximise efficiency.

It has a **user friendly dashboard** where you can view all security activities and compliance at any time, across all sites in **real time**. If any activities have not been conducted, the system **alerts** the relevant supervisors.

With Viridian **incident response** could not be quicker - **adaptable smart forms** means that all reporting is done effectively and quickly while **minimising human error**. **Customised alerts for incidents** mean that you will receive email or phone notifications if any issues occur.
